

AgriSETA - List of Learning Programmes - 2009

Over the years SDFs had to provide us with a list of learning programmes when developing the WSP. Learning programs listed were varied and in many cases different titles are used to described the same field of learning. In order for us to interpret the data collectively, it becomes a major effort to attempt to categorise these varied lists of learning programmes.

We attempted to categorise these learning programmes into major clusters. Attached please find the list. The first column describes the major cluster whilst the second column describes the learning programmes as you have listed them in the past – minimum changes were instituted. Where possible, we request you to use the major clusters as the description of your learning programmes. In essence: you can identify a learning programme from the right hand column and relate it to the major cluster.

Use the major cluster as the learning programme in the WSP/ATR. To find a learning programme, type part of the name in the search block. Select find next /search untill you see the correct one you are looking for.

The attached is a first attempt – some descriptions were vague or used technical terms we may have interpreted incorrectly. We will be grateful if you pick up an incorrect allocation to indicate it to Amandie Gerber via fax or e-mail who will adjust and clean up the list over time.
